As President-Elect/President I will represent the membership of ANNA making sure your voice is heard throughout the renal community.

- Our voices must be the defining factor in ensuring the role of the nephrology nurse including the utilization of an evidenced-based care delivery system. As your leader, I will guide us to not be just a passive influence but to be the respected leaders in this process.

- To continue down the road for success, I will utilize our Strategic Plan to improve our technological capabilities to meet the needs of our members.

In order to move our organization forward we must listen to a quote by President Obama:

“We need to believe in the hope for something better and work together to create a better future for ourselves and those that follow in our footsteps.”

I will not be able to do this alone, but with you I believe anything is possible!

Sheila J. Doss-McQuitty, MBA, BSN, CNN, CCRA
